

Leadership.

Focus.

Excellence.

**BC WOMEN'S HOSPITAL+ HEALTH CENTRE**

An agency of the Provincial Health Services Authority

**BC Women's Hospital & Health Centre (BCW)** is the only facility in British Columbia devoted primarily to the health of women, newborns and families. It provides a broad range of specialized women's health services that address the health needs of women of all ages and backgrounds. BC Women's is one of the largest maternity facilities in Canada, with over 7,000 births a year, and is both the major primary and secondary maternity services provider in the Lower Mainland and the cornerstone of the provincial tertiary care system. As an academic health centre BCW's mandate includes providing strong leadership in research and the education and professional development of health care professionals in areas related to the health of the populations we serve.

**Opening in November 2017** the new **Teck Acute Care Centre (TACC)** which will provide highly-specialized care for children and women in British Columbia. The lifeline of the TACC will continue to be the care givers and support staff working in the new, modern facility. These passionate individuals are devoted to bringing a better quality of life to the patients that we serve.

BCW is an agency of the **Provincial Health Services Authority (PHSA)**, which plans, manages, and evaluates selected specialty and province-wide health care services across BC. PHSA embodies values that reflect a commitment to excellence. These include: *Respect people • Be compassionate • Dare to innovate • Cultivate partnerships • Serve with purpose.*

### Nurse Practitioner - Urgent Care Centre

Reference #54389

Regular Full Time

**BC Women's Hospital and Health Centre  
Vancouver, BC**

The Nurse Practitioner is responsible and accountable for the comprehensive assessment of patients and clients including diagnosing diseases, disorders and conditions. The Nurse Practitioner initiates treatment including health care management, therapeutic interventions and prescribes medications in accordance with the statutory and regulatory standards, limits and conditions, and employer policies and procedures. Nurse Practitioners provide professional guidance to other health professionals and participate autonomously as members as the interdisciplinary health teams making referrals to specialist physicians as appropriate. This is an exciting opportunity to be a part of the high risk maternity care team that will be transitioning from the current facility to a state of the art obstetrical unit in the Teck Acute Care Tower that will be opening November, 2017.

Nurse Practitioners collaborate with clients and other health professionals to identify and assess trends and patterns that have implications for clients, families and communities; develop and implement population and evidence based strategies to improve health and participate in policy-making activities that influence health services and practices. As professionals, they participate in peer review and self-review to evaluate the outcome of their services at the client, community and population level. They are responsible for their professional development and maintaining competence and registration as a nurse practitioner.

#### Qualifications

Current registration as a Nurse Practitioner with the College of Registered Nurses of British Columbia (CRNBC). Must be eligible to complete the Objective Structured Clinical Examination (OSCE) through the College of Registered Nurses of British Columbia (CRNBC). Minimum of (4) years of recent, relevant clinical nursing experience. Urgent Care Center - Perinatal Program, Triage, Labour and deliver and assessment experience preferred.

Ability to perform the full scope of Nurse Practitioner duties and responsibilities. Able to define and articulate the specific areas of practice and client population for whom the NP is competent to provide health care services. Able to self-direct, interact, and adapt effectively with other professionals in complex, dynamic situations. Ability to communicate and collaborate with patients and families about health findings, diagnosis, treatment, self-care and prognosis. Demonstrated ability to communicate effectively and build relationships with nurses and other health professionals and disciplines using a variety of communication strategies. Excellent interpersonal skills and ability to lead a team and work within a team. Demonstrated ability to transfer knowledge, teach coach and mentor others; ability to implement and evaluate planned change. Able to critically assess and evaluate health research literature to determine best practices; ability to introduce education and evidence based research into practice areas. Skill in assessing and recognizing population health trends; able to plan and implement strategies for population based prevention and health promotion. Able to supervise others and evaluate the care they deliver as required.

If you are passionate about delivering a high standard of clinical care and excellent patient experience, we invite you to apply by visiting our careers site at [www.phsa.ca/careers](http://www.phsa.ca/careers) where you can register for the first time or enter your Username and Password in order to re-access your profile on our system.
